

Before launching the Bizzzly application in the Bizzzly folder – you must install MySQL. MySQL is a free and open source database management system widely used in desktop and web applications.

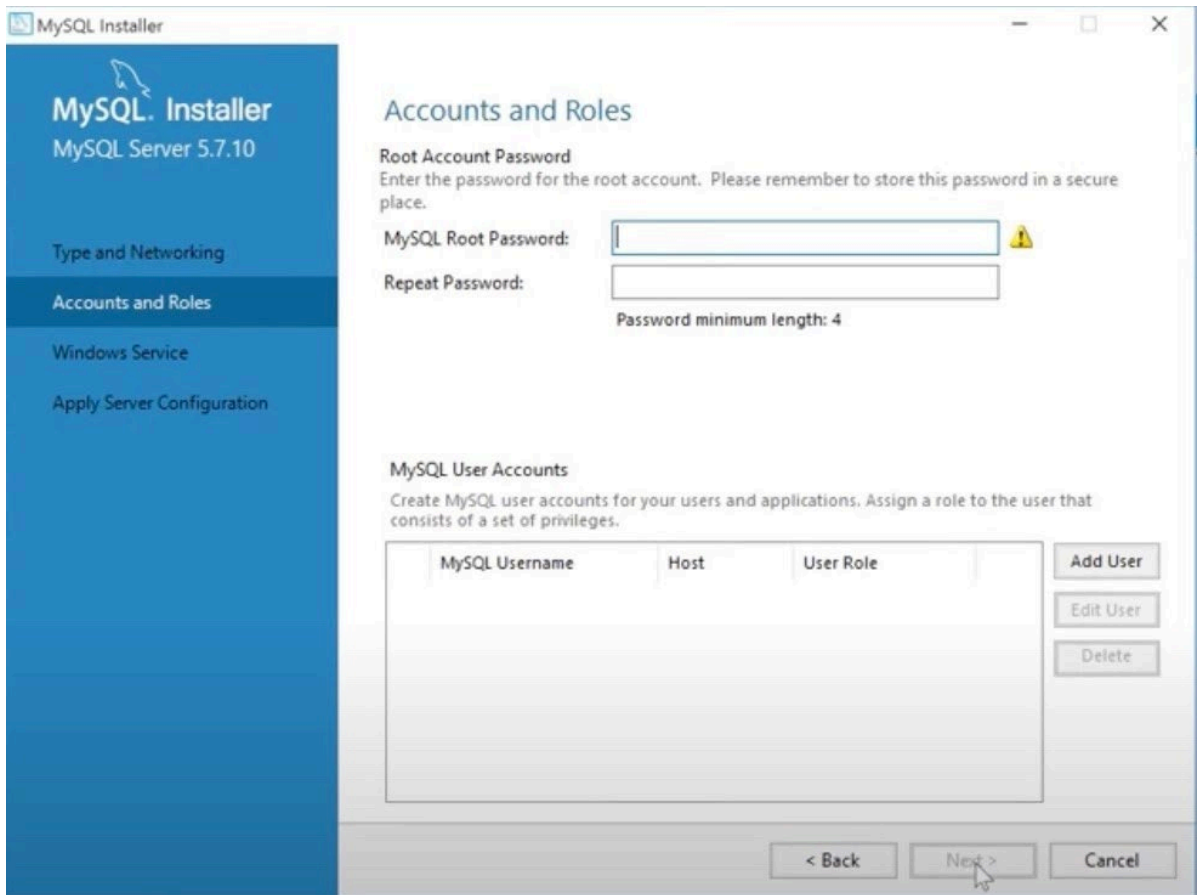

First you need to install MySQL

Instructions for installing MySQL:

1. Open the MySQL installer file included in the zip file.

3. Click next and execute

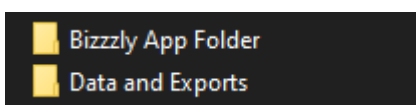

5. Enter this password on the screen shown above (VERY IMPORTANT): 12345
6. Now keep clicking next and execute until you see the finish page.

After completing the installation of MySQL – you may continue with launching the Bizzzly app folder. Do not modify any other files in this folder.
