

Manual

1) Install MySQL

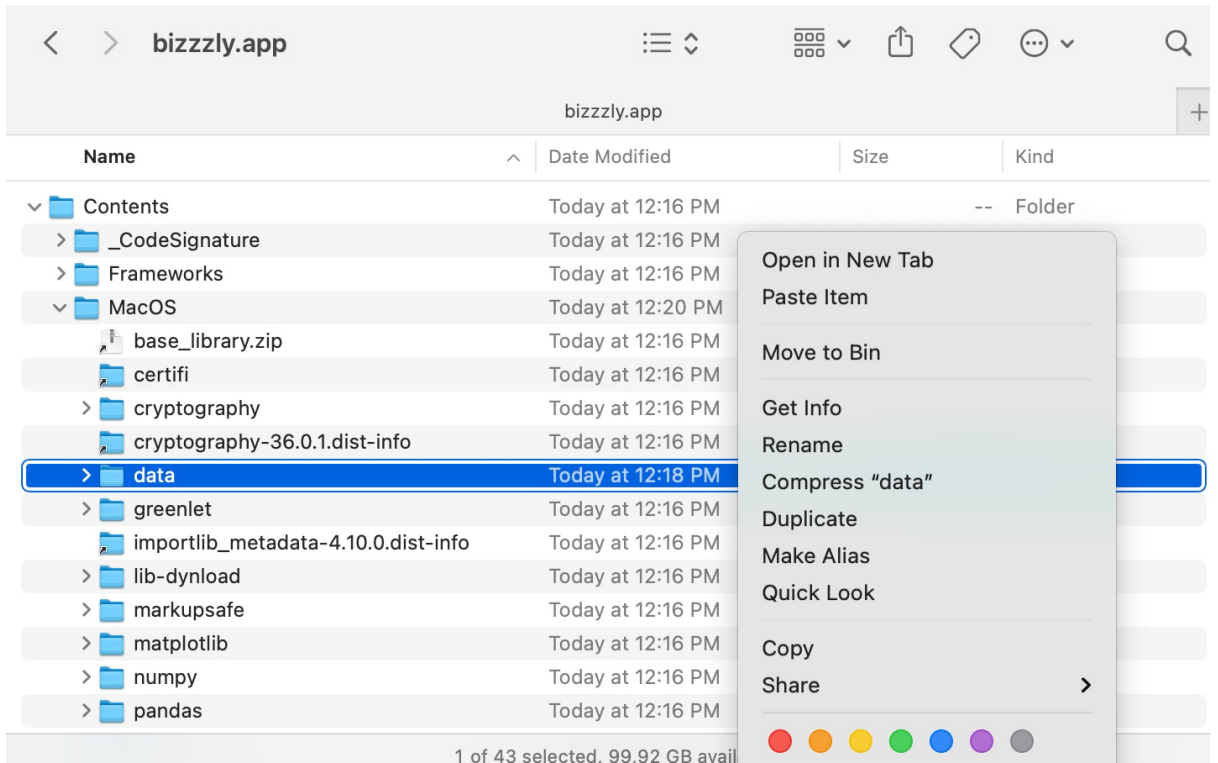

Follow this tutorial: <https://www.youtube.com/watch?v=k2EtMqUNkm8>

Make sure the password you set for root during installation is: 12345

2) Right click on bizzzly.app and select "Show Package Contents"

3) Now select Make Alias for data folder

4) Copy newly created folder to wherever you want, you can also change its name. All reports and other data will be inside this.
